

## Assessing and Improving Risk Management Practices

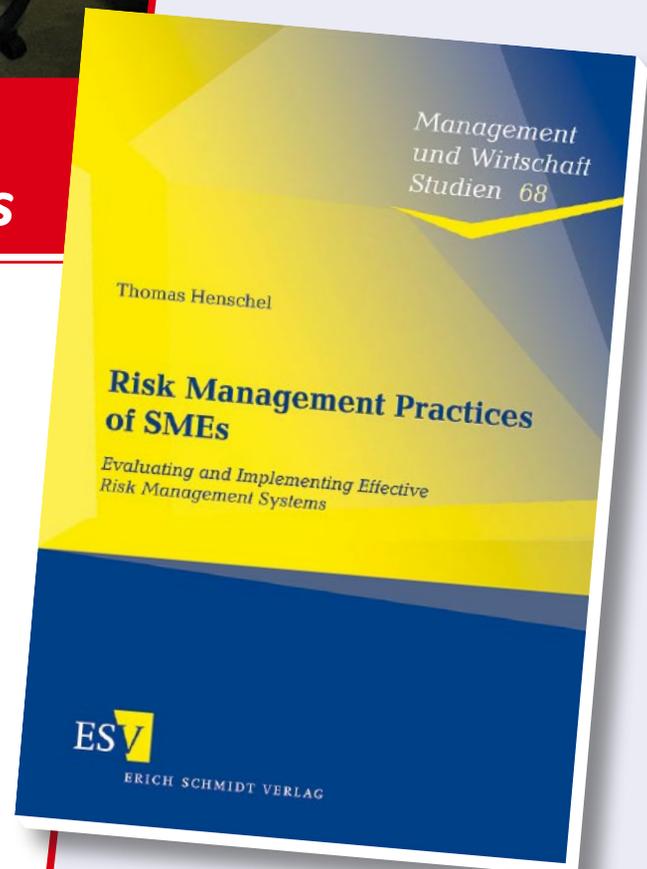

**F**or SMEs, the establishment of a risk management system is essential to their survival, since it affects their ability to continue to receive credit from banks. When rating a SME, the lending bank will also assess the proper implementation of a risk management system.

Thomas Henschel presents a scoring approach, which

- ➔ allows the evaluation of risk management in businesses and also their system of planning and corporate governance
- ➔ is very transparent and thus can easily be adapted for similar research problems of risk management
- ➔ allows a differentiated assessment of separate scoring figures for each component of a holistic risk management system.
