- 1,900 staff
- 3,000 modules
- 6 schools
- 3 campuses
- Alma, Primo, CampusM
- Xxxxx records in Alma

What we had & what we did

What happened

What we learned & what we'll do next

How we did it

Why we did it

What we had

- No clear system
- Out of date, or only indicative
- Inaccessible to Library staff
- No consistency
- Potential copyright infringement (!)

What we learned

- You can never consult too widely
- Connected systems sometimes results in connected problems
- Consider the training needs of everyone
- Documentation is important
- Not all modules use or need a Reading List

What we will do next

- Target modules that are part of our international programmes
- Explore the use of additional widgets in Moodle
- Add the LTI integration to our Moodle Minimum Standards
- More training for our Library staff

How we did it: Planning

- Two Schools participated in a 'soft launch' in January 2017
- Reading Lists were created and loaded one month prior
- Launched University-wide in September 2017
- Scaffold help and support from across Information Service
- Communications plan developed in advance

How we did it: Communication

How we did it: Project Team

- VLE Developer (Moodle)
- Systems Administrator
- Student Systems Officer
- Liaison Librarians
- Acquisitions Staff
- Campus Support Manager
- Information Operations Assistants
- Friendly Lecturers as Early Adopters

Why we did it: Library staff

"Library staff are being asked to do more with less these days. We're also being encourage to increase our 'visibility' and to collaborate more. As an example, Reading Lists are a great way for us to achieve all of this. They help us to be more noticeably involved in the academic process alongside lecturers and students."

"It's helping us to be more efficient."

Why we did it: Students & Lecturers

Students

"Highly beneficial... Mainly because of the ease of accessing core material. From a 4th year perspective this is very useful."

"By streamlining the process it could result in more students engaging with the material rather than just lecture slides."

Lecturers

"Leganto is super easy to use (even as a non-techy person!) and (fingers crossed) the students will read more as it is making resources more accessible."

"It's very easy to use and update as teaching develops during a trimester."

Questions for you

- What do reading lists at your library look like?
- Would you have done anything differently?
